

SENTRY SA DRITAIL - neomycin sulfate liquid

Sergeant's Pet Care Products, Inc.

INDICATIONS AND USAGE

SYMPTOMS:

- Diarrhea
- Wet or matted tail
- Dehydration
- Obvious changes in appearance or behavior

Concentrated formula

Easily administered in water

Designed to appeal to small animals' tastes

Treats symptoms in hamsters, gerbils, mice, rats, and guinea pigs.

DOSAGE & ADMINISTRATION

Treat animal with full recommended dosage. Discontinue feeding greens and roughage to animals that have diarrhea. Treat for a minimum of 5 days. Repeat the treatment if necessary. If condition persists and no improvement is noted during treatment, consult your veterinarian. Sick animals should be separated from healthy animals. If more than one animal is caged together, all animals should be treated for a period of 5 days to prevent infection.

Oral Dropper Method (for hamsters and guinea pigs only):

Weigh your pet and use the weight chart to determine the amount of DriTail to use. Young animals (six months old or less) should be given 1/2 the recommended adult dosage. Allow the animal to lap medicine from the dropper; be careful not to force medicine into the mouth faster than your pet can lap it up.

Common Name	Weight	Amount of DriTail
Siberian Hamster	25-35g (1 oz)	1/4 mL (8 drops) once daily
Chinese Hamster	30-50g (1 1/2 oz)	1/4 mL (8 drops) once daily
Golden Hamster	110-140g (4-5 oz)	1/2 mL (16 drops) once daily
Guinea Pig	800-1200g (2-2 1/2 lbs)	3/4 mL (24 drops) once daily

Oral Drinking Water Method (gerbils, mice, rats, hamsters, guinea pigs):

Add 3 teaspoons (15 mL) of DriTail to 4 oz. (120 mL) of water. The water should be changed daily and should be your pet's only source of water.

PRECAUTIONS

Do not use for nonrodents such as rabbits. For pet animal use only.

KEEP OUT OF REACH OF CHILDREN

ACTIVE INGREDIENT

Neomycin sulfate equivalent to not less than 20 mg/mL of neomycin base.
